

Internet Explorer Settings for New Website Menu Activation

If the dropdown menus on our website are not functioning for you please try the following.

1. Open Internet Explorer
2. Click on the Tools menu at the top of the screen
3. Choose the Security tab
4. Click on the globe that says Internet under it
5. Click on the Custom Level button
6. A new window will open called Security Settings
7. Scroll down near the bottom to the heading of "Scripting"
8. Under "Active Scripting" choose "Enable"
9. Click OK
10. Then Ok again
